

Received a phone call from Mr. Jim Hanson election campaign 20210830

On 2021-08-30 receive a phone call from 604-294-0291, Mr. Taha, from Mr. Jim Hanson's election campaign, asking about views on the election.

I explained I wish the Ministers of Health and the Public Health Officers at the federal and provincial levels would see the GitHub web pages and an online tool named CovidVisualizedCountry. CovidVisualizedCountry is a tool I have created to visualize the predictions of the international and updated studies of the COVID-19 epidemic in Canada and its provinces. Predictions of the COVID-19 cases and even deaths in the current fourth wave are higher than those in the previous waves in some provinces. The details are to be examined by the public health specialist.

The web address is available on my Twitter, Farshad Pourmalek. I have sent emails to those authorities explaining the use of the tool, its scientific basis, and my academic and professional qualifications. I have sent an email to Mr. Terry Beech MP BC as well. Even I printed one of the reports and regular-mailed the hard copy to Dr. Bonnie Henry in MOH in Victoria. I have not heard back from any of them. After several emails I sent, I stopped sending further emails in vain. I do update the predictions for Canada, Iran, and the global level. I do not need a response but hope they see and use the curated information in the CovidVisualizedCountry GitHub web page to help prevent even one more case or death.

To this end, I asked Mr. Taha from Mr. Jim Hanson's election campaign to consider sharing this information with their campaign to inform the public health authorities to see the curated information if they find it useful. Mr. Taha responded he would do so.
